

THE CELEMETRIX COMPLIMENTARY TECHNOLOGY ROADSHOW '09

IGNITE YOUR CAREER - THE NBN, IT'S TECHNOLOGIES & THE OPPORTUNITIES AVAILABLE TO YOU

CELEMETRIX

the art of measurement

The Government's imminent launch of Australia's largest telecommunications project provides great opportunities to those in the know. As the leading player in FTTx technologies in Australia, Celemetrix will provide you with comprehensive information to plan for the NBN build.

Attend our complimentary half-day seminar to hear about:

- Latest NBN developments –
100Mb/s service delivery – Not 12Mb/s
- FTTP service delivery models - Why GPON?
- Can the fibre handle it? What's new and what you should be aware of, above & below ground
- External plant FTTP build technologies
- Pressure on HFC technologies
- Benefiting from the NBN; demands on home networking, cabling & equipment
- Effects on core network infrastructure and the development of 100Mb/s Ethernet
- Using MPLS to manage service delivery - End to End QoS
- Opportunities for you:
 - Design
 - Construct
 - Commission

PLUS! Two detailed breakout sessions relating to:

1. FTTP – THE ACCESS – THE ULTIMATE CONNECTIVITY ENGINE

When any industry experiences large investment, like the NBN, new technologies emerge and are implemented to meet the challenging demands of the network. FTTP allows for a new approach to many traditional fibre optic concepts. In this session we will explore what you should be aware of when designing, constructing and commissioning FTTP networks; new products, new commissioning techniques and most importantly what this network will deliver.

2. FTTP – THE CORE – THE ULTIMATE SERVICE DELIVERY ENGINE

Most telecommunications networks today operate with some type of traffic engineering technology. In this session we will look at the use of Ethernet in the core and access networks, which is required to deliver large-scale multifaceted service models like IPTV, VOD, VoIP, video conferencing, online collaboration and so on. We will discuss the use of routing technologies (MPLS), the pitfalls and managing network engineering limits.

Get ready – Tomorrow is just around the corner

Register online at www.celemetrix.com.au/roadshow09 or fill in the registration form on the reverse side and fax to us.

Secure your place – register now – places are limited!

**IGNITE YOUR CAREER - THE NBN
IT'S TECHNOLOGIES & THE
OPPORTUNITIES AVAILABLE TO YOU**

**PLEASE TICK YOUR DESIRED
LOCATION BELOW:**

BRISBANE

Tuesday 27th October 2009
Park Regis North Quay
293 North Quay, Brisbane

SYDNEY

Wednesday 28th October 2009
Novotel Sydney Olympic Park
Olympic Boulevard
Sydney Olympic Park

MELBOURNE

Friday 30th October 2009
The Manningham Civic Centre
699 Doncaster Rd, Doncaster

**YOU CAN ALSO
REGISTER ONLINE AT
[WWW.CELEMETRIX.COM.AU/
ROADSHOW09](http://WWW.CELEMETRIX.COM.AU/ROADSHOW09)**

Registrations from 7:30am. The seminar will commence at 8:00am and finish at 11.45am approximately. Light refreshments will be provided. **Note:-** It is only possible to attend one break-out session per person because they run concurrently. Please nominate which session you'd like to attend below:

FTTP: The Access – The Ultimate Connectivity Engine

FTTP : The Core – The Ultimate Service Delivery Engine

Please fill in the following details and **fax this form to 03 9845 0555**
